

STUDENT LEARNING OUTCOMES

Special Topics in Healthcare Administration, Undergraduate Certificate

This certificate program's goal is to increase students' skills and knowledge of the concepts, principles, and regulations that impact the healthcare industry. This certificate program will also help early careerists develop a deeper understanding of the role of the healthcare system in caring for special populations.

Student Learning Outcomes

- Apply appropriate concepts, principles, and regulations in analyzing and evaluating issues in healthcare administration.
- Examine the effectiveness of the United States healthcare system and healthcare professionals caring for special populations.

Assessment of Student Learning Outcomes

- Certificate Training Assignments
- Essay Assignments
