Data Science, Undergraduate Certificate

In the University of West Florida's fully online Undergraduate Data Science Certificate program, students will learn relevant programming languages, statistics, and the modeling and computational techniques needed for Data Science. The comprehensive curriculum helps to identify, formulate, and solve data problems by selecting and applying appropriate methods in various fields. Students will understand the broad impact of data on society and can raise critical questions about data, its interpretation, and visualization.

Student Learning Outcomes

- Students will identify, formulate, and solve the data problems by applying appropriate methods.
