The Estimated Cost Worksheet will help you calculate your direct cost of attendance. If you decide to attend UWF, you will receive an email when your account balance is available. The costs below may change based on how many credit hours you take, your meal plan selection, and whether or not you live on campus. Please review our estimated annual costs on the Splashonomics sheet.

A. Estimating Tuition and Fees

Tuition rates are based on your residency status. Calculate your tuition based on the number of credit hours enrolled multiplied by the tuition rate for your residency status:

\[
\text{Total Tuition} = \text{# of Credit Hours} \times \text{Per Credit Hour Tuition Rate}
\]

B. Estimating Housing Costs

Choose the appropriate cost connected to the housing option you selected:

Housing Cost

C. Estimating Dining Plan Costs

Choose the appropriate cost for the meal plan option you selected:

Meal Plan Cost

D. Direct Cost

Add the totals of A, B, and C to determine the direct cost of your selections:

\[
\text{Direct Cost} = \text{Total Tuition} + \text{Housing Cost} + \text{Meal Plan Cost}
\]

E. Total Estimated Cost

Subtract the total amount of scholarships, financial aid awards, etc. as seen on the Financial Aid Award Letter from the Direct Cost ("D" above) to calculate the Total Estimated Cost:

\[
\text{Total Estimated Cost Per Academic Year} = \frac{\text{Direct Cost} - \text{Financial Aid Award}}{\text{Per semester estimated cost}}
\]

**Does not include books, parking, material and supply/equipment fees, or other incidental expenses. This amount is not intended to be a total cost of attendance, nor is it inclusive of all expenses and costs in attending. This worksheet does not take into consideration any of the Florida Prepaid contracts.**
