From Admitted to #ArgoNation, Your Quest Starts Now

Opportunity waits for no one. So jump in, get your feet wet and make a splash. From a virtual-reality, 3D visualization lab to discovering shipwrecks just under the surface, the University of West Florida is the perfect place to start making waves.

Dive into research with our award-winning faculty, and discover ways to change the world. Our students have written and published their own books, started their own companies and played at Carnegie Hall. Our faculty have built robots, created mobile apps and taken their classes on road trips across the country.

From Admitted to #ArgoNation, Your Quest Starts Now
This campus is so inviting and welcoming for so many different people. No matter what, people will accept you and help you be a better you.”

—Yasmin Hernandez, UWF Marine Biology and Environmental Science Major

“UWF was my first-choice school. The resources given to me here have changed my life. From the first person I interacted with over the phone, I have been blown away by how much everyone cares. They have provided me with the tools needed to grow academically, professionally and personally.”

—Timothy Jones, Communication Arts Major
